Zenith Energy Environmental Management Policy

Zenith Energy recognises that excellence in managing environmental and social responsibilities is essential to long-term success.

We are committed to manage and minimise any adverse impacts on the environment, local cultures, and heritage as a result of our work activities.

As Such, our Commitments are to:

- Set the goal to achieve a Net Zero target by 2035.
- Monitor and minimise environmental impacts due to air pollution and greenhouse gas emissions as a result of company’s operations.
- Adhere to the commitments to manage hazardous substances, chemicals and fuels through compliance to our Workplace environmental Management Plans.
- Find opportunities to make our resourcing and material sourcing as efficient and cost effective as possible.
- Identify and act to eliminate or reduce generation of waste to minimise environmental impacts.
- Set in place controls to minimise any environmental impact from physical risks to our assets.
- The protection of various biodiversity elements and minimise the impact on surrounding flora, fauna, land and vegetation.
- Recognise and respect the cultural and heritage in locations where we operate.

To achieve these Commitments, Zenith Energy will:

- Establish measurable environmental objectives and targets to meet these commitments, assessing and reporting performance, and using best available practices.
- Seek opportunities to increase energy efficiencies.
- Identify, assess, manage, and educate our employees on the environmental risks associated with our work activities.
- Comply with all relevant legislation, standards, and other requirements.
- Communicate these aims and commitments to our people, and our stakeholders, including traditional owners and consult with them regarding environmental management.
- Propose renewable solutions for power generation where applicable.
- Strive to reduce our environmental impact.

Hamish Moffat
Managing Director
